7. Gold D-rings + rivets kit (MELORDY) — Buy on Amazon
8. Bosal In-R-Form fusible foam stabilizer — Buy on Amazon

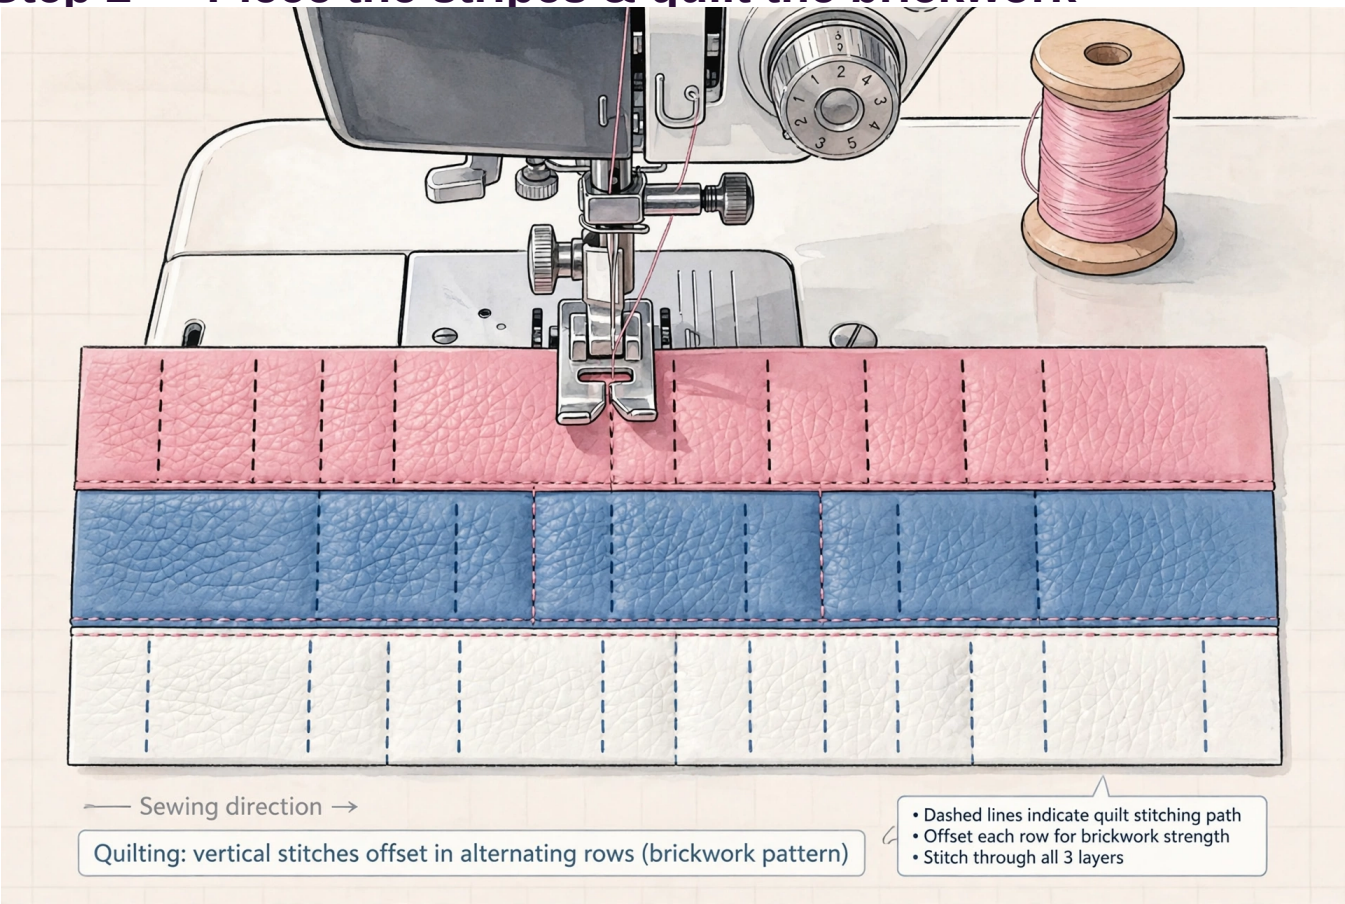

Also needed: quilting cotton for lining, polyester upholstery thread, leather needle 100/16, double-sided basting tape, rotary cutter, awl, needle-nose pliers.

Step 1 — Cut it all out

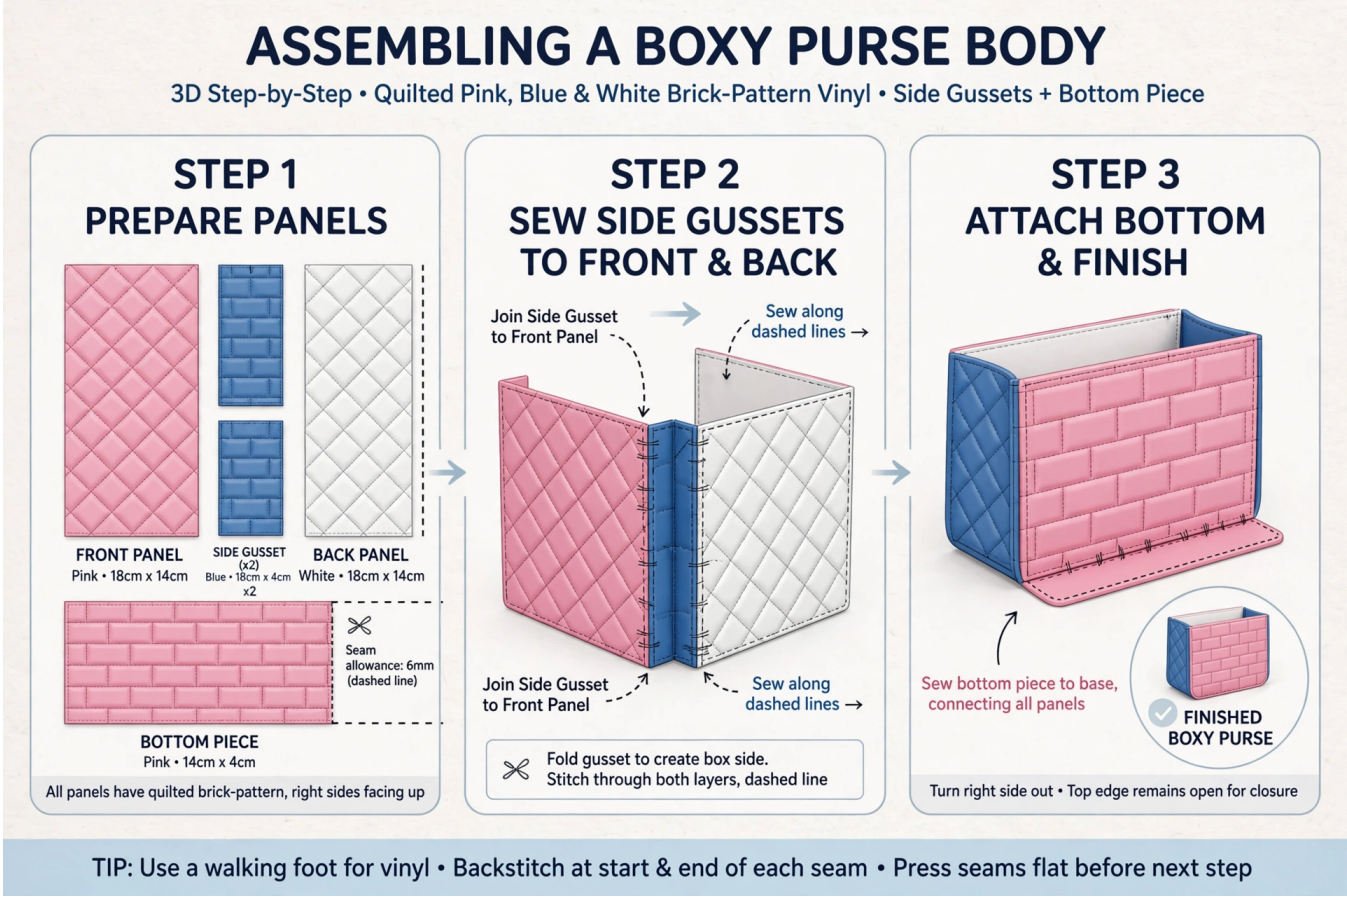

Cut from vinyl: 5 strips per panel (pink, blue, white, blue, pink — 9¾" x 1¾" each), 2 side gussets (3¾" x 5¾"), 1 bottom (9¾" x 3¾"), 1 flap (9¾" x 4½"). Cut lining and foam interfacing to match every piece.

Step 2 — Piece the stripes & quilt the brickwork

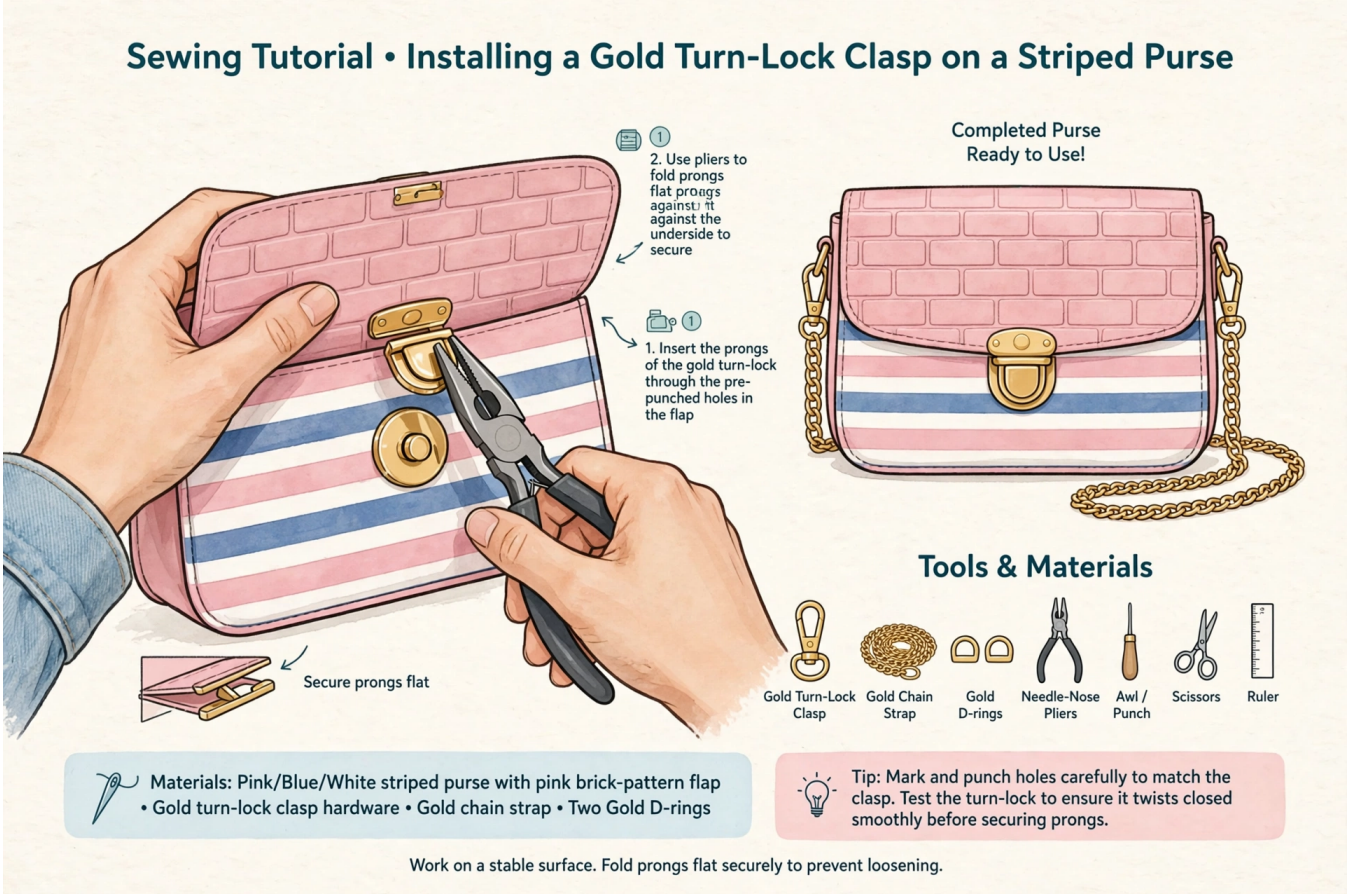

Sew the 5 strips together per panel (3/8" seams), press seams open with a cool iron through a press cloth. Fuse interfacing to the wrong side, then quilt vertical lines every 1½", offset ¾" in alternating rows — that's the brickwork. Use a walking foot, stitch length 3.5mm.

Step 3 — Build the body

Sew gussets to the front and back panels, then sew in the bottom panel. Clip corners and turn right side out. Make the flap the same way: sew outer to lining right-sides together on three sides, turn, topstitch ¼" from the edge, quilt to match.

Step 4 — Hardware & finish

Punch holes and install the gold turn-lock on the flap and front panel. Sew the lining like the body (leave a 5" turning gap), drop it in, topstitch the lining to the body around the top. Rivet D-ring anchors to each gusset, clip on the chain. Done — carry history.
